## IMPORTANT!

- Only use with bottled water or water that has been dechlorinated with Zoo Med's REPTISAFE®.
- Read, understand, and follow manufacturer's directions and warnings.

- For reptile/amphibian use only.
- For indoor use only.

## REPTISAFE® INSTANT TERRARIUM WATER CONDITIONER

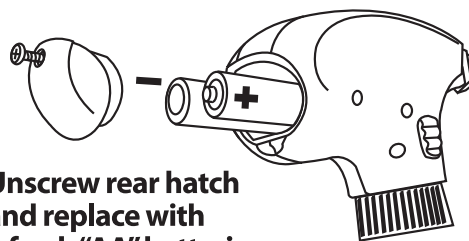

- Removes chloramines and chlorine.
- Neutralizes toxic ammonia.
- Provides essential ions and electrolytes.

## PLEASE READ THIS BEFORE USE

### Helpful Hints

- The sprayer is shipped to you with Safety Lock in the ON position for packaging needs. Keep the Safety Lock in LOCK position when storing or changing fluid bottles or batteries.
- Straighten pick up tube before attaching multi-purpose sprayer to container.
- Select SPRAY or STREAM by turning nozzle before use.
- Pull trigger, wait several seconds for fluid to prime. Try not to oversaturate your terrarium with water as it is better to get the terrarium plants and substrate "slightly wet." Check the humidity level 30-60 minutes later and repeat if higher humidity is still needed. Always use a good quality humidity gauge to monitor your terrarium humidity level. Read a good care book on the particular species of reptile/amphibian you are keeping to obtain the proper humidity level information.
- **To Increase Humidity:**
  1. Increase substrate depth (Zoo Med's Eco Earth® is a good choice).
  2. Cover half the top of your terrarium to keep the heat/humidity inside terrarium.
  3. Increase heat and amount of water you are spraying.
- **To Decrease Humidity:**
  1. Decrease heat (but still keep in the safe recommended range for your reptile/amphibian).
  2. Increase ventilation—does your terrarium have a full screen top?
  3. Spray less water, less often.
- To STORE sprayer always move the Safety Lock to the LOCK position.
- If the spray is inconsistent the nozzle may be partially blocked. Flush with warm water.
- If the sprayer motor does not run, check batteries for correct polarity in the battery hatch, as shown.
- If the sprayer motor runs but does not spray, replace old batteries with new batteries, do not mix old with new.
- The sprayer is packaged with the batteries installed. For best results, remove the batteries, wipe dry and reinstall before use. Condensation may occur during shipment.
- Your satisfaction is our greatest concern. For Questions or Comments please call (805) 542-9988 or e-mail customer service at: zoomed@zoomed.com.

### BATTERY REPLACEMENT

**Unscrew rear hatch**  
**and replace with**  
**2 fresh "AA" batteries**

## WARNINGS

- **KEEP AWAY FROM CHILDREN.** This sprayer is not Child-resistant. Keep the Safety Lock in LOCK position when not in use.
- **DO NOT MIX BATTERIES;** Never mix old batteries with new. Do not mix Alkaline with standard (carbon zinc) or rechargeable (nickel cadmium) batteries.
- **NEVER PLACE THE NOZZLE IN YOUR MOUTH.**
